HFCL એ હૈદરાબાદમાં નવી સુવિધામાં FTTH

કેબલ્સનું વાણિજ્યિક ધોરણે ઉત્પાદન શરૂ કર્યું

નવી દિલ્હી, તેલંગાણાના હૈદરાબાદમાં સ્થિત HFCLની નવી ફાઇબર-ટુ-ધ-હોમ (FTTH) કેબલ ઉત્પાદન સુવિધાએ ૧૬ ડિસેમ્બર, ૨૦૨૦થી ફાઇબર ટુ હોમ એપ્લિકેશન્સ માટે ઓપ્ટિકલ ફાઇબર કેબલ્સનું ઉત્પાદન શરૂ કર્યું છે. હૈદરાબાદમાં આ ઉત્પાદનની શરૂઆત સાથે HFCL એની પેટાકંપની HTL લિમિટેડ સાથે સંયુક્તપણે ભારતમાં દર વર્ષે ૬ લાખ કિલોમીટરની લંબાઈ સાથે FTTH કેબલનું સૌથી વધુ ઉત્પાદન કરનારી કંપની બની ગઈ છે.

કંપનીએ અગાઉ ઓપ્ટિકલ ફાઇબરના ઉત્પાદન માટે હૈદરાબાદ પ્લાન્ટમાં રૂ. ૨૬૦ કરોડનું રોકાણ કર્યું હતું અને જાન્યુઆરી, ૨૦૨૦માં ઉત્પાદન શરૂ થયું હતું. આ અઘતન, ઓટોમેટેડ હાઈ-સ્પીડ FTTH કેબલ સુવિધા રૂ. ૪૦ કરોડના નવા રોકાણ સાથે શરૂ થઈ છે, જે ઊંચું ઉત્પાદન, વાજબી ખર્ચ અને ગુણવત્તાયુક્ત ધારાધોરણો સુનિશ્ચિત કરશે. આ રીતે કંપનીની વિસ્તરણ યોજનાના ભાગરૂપે હૈદરાબાદ પ્લાન્ટમાં અત્યાર સુધી રૂ. ૩૦૦ કરોડનું રોકાણ થયું છે. આ અંગે HFCLના મેનેજિંગ ડાયરેક્ટર શ્રી મહેન્દ્ર નાહટાએ કહ્યું હતું કે, “હૈદરાબાદમાં અમારી લેટેસ્ટ સુવિધા HFCLને સૌથી મોટી FTTH કંપની બનાવે છે. ભારતમાં ખાનગી ટેલીકોમ કંપનીઓની કામગીરીનું વિસ્તરણ

થવાથી અને સરકારની ગ્રામીણ નેટવર્ક વધારવા પર ભાર મૂકવાને પગલે FTTH કામગીરીમાં વધારો થયો છે. FTTH ઉત્પાદનમાં વધારો થવાથી આપણા દેશની જાજીર કનેક્ટિવિટી વધવાની સાથે આપણી પછ માટેની સફળતામાં પણ વધારો થશે. હાઈ-સ્પીડ ઇન્ટરનેટની પહોંચ વધવાથી, ડિજિટલ નેટવર્કમાં રોકાણ વધવાથી અને વાજબી ખર્ચ સુવિધા માટેની માગમાં વધારો થવાથી અમને ભારત અને દુનિયાભરમાં ગ્રાહકોની અઘતન કમ્યુનિકેશન જરૂરિયાતો પૂર્ણ કરવાની ખુશી છે.”

FTTH કેબલ પ્લાન્ટ કંપનીની હાલની ઉત્પાદન સુવિધામાંથી ઓપ્ટિકલ ફાઇબર અને ARP રોડ જેવા મુખ્ય કાચા માલના પુરવઠા માટે બેકવર્ડ ઇન્ટિગ્રેશન છે, જેનાથી સપ્લાય ચેઇન મજબૂત થશે.

ભારતમાં ટેલીકોમ સર્વિસ પ્રોવાઈડર્સને FTTH કેબલ સપ્લાય ઉપરાંત HFCL ૩૦થી વધારે દેશોમાં નિકાસ પણ કરશે, જ્યાં કંપની અત્યારે કામગીરી ધરાવે છે. કંપની HFCL બ્રાન્ડ નેમ અંતર્ગત FTTH કેબલ્સનું માર્કેટિંગ કરશે.

કંપનીની સંશોધન અને વિકાસ સુવિધાઓ નવા કેબલ્સના વિવિધ વેરિઅન્ટ વિકસાવી રહી છે, જેનું ઉત્પાદન પણ હૈદરાબાદમાં સ્થાપિત નવી સુવિધામાંથી થશે.

New Delhi [India], December 17 (ANI): Himachal Futuristic Communications Ltd's (HFCL's) new fibre-to-the-home (FTTH) cable manufacturing facility in Telangana has started commercial production of optical fibre cables for fibre-to-home applications. With this, HFCL and its subsidiary company HTL Ltd has become the largest manufacturer of FTTH cables in India with a capacity of six lakh km per year.

The company had earlier invested Rs 260 crore in the **Hyderabad** plant for manufacturing optical fibre that was commissioned in January.

"The new automated high-speed FTTH cable facility has come up with a fresh outlay of Rs 40 crore to ensure high throughput, economies of scale and the highest quality standards," HFCL said in a statement on Thursday.

Managing Director Mahendra Nahata said India is seeing buoyant FTTH activity driven by private telcos and the government's thrust on rural network deployment. Expanding FTTH rollouts will not only boost the country's 4G connectivity but it also enhance readiness for 5G.

"The momentum in penetration of high-speed internet, increasing investment in digital networks and growing demand for affordable access makes us excited to serve the next-generation communication needs of customers in India and across the globe," he said.

The FTTH cable plant has backward integration for supplies of major raw materials like optical fibre and ARP rods from the company's existing manufacturing facilities, further strengthening the supply chain.

Apart from supplying FTTH cables to telecom service providers in India, HFCL will also be exporting them to more than 30 countries. (ANI)

HFCL starts making FTTH cable at Hyderabad plant

Thanks to the rapid roll-out of fiber broadband services by partner Reliance Jio, telecom player HFCL Ltd has started producing residential broadband-oriented fiber cables at a new facility in Hyderabad.

HFCL's new optical fiber plant in Hyderabad came online in January this year, and on Wednesday, the plant started making smaller size optical cable that can be used for providing high-speed broadband to homes.

With this, said HFCL, it has become India's largest producer of such residential-use optical fiber cable, and can produce 6 lakh km of such cable per year.

A large chunk of the production is expected to be utilized by HFCL itself, as it is also the primary contractor for supplying fiber to Reliance Jio's rapidly expanding fiber-to-the-home service.

Besides Jio, the biggest consumer of FTTH cable — which tends to have a tough outer covering making them suitable to be strung overhead from pole to pole — are local cable operators, who are busy replacing their copper cables with fiber optic pipes. This demand is met by a mix of domestic as well as imported cables.

ACCELERATING ROLL OUT

After starting slow by adding 20,000 to 40,000 users per month, Reliance Jio is now adding over 2.5 lakh connections per month, making it the fastest growing wired

Himachal Futuristic Communications (HFCL), a leading integrated telecom solutions provider, today said its new fibre-to-the-home (FTTH) cable manufacturing facility in Telangana has started commercial production of optical fibre cables for fibre-to-home applications.

With this, HFCL and its subsidiary company HTL has become the largest manufacturer of FTTH cables in India with a capacity of six lakh kms per annum. The company had earlier invested Rs 2,600 million in the Hyderabad plant for manufacturing optical fibre that was commissioned in January 2020.

"The new automated high-speed FTTH cable facility has come up with a fresh outlay of Rs 400 million to ensure high throughput, economies of scale and highest quality standards. Thus far, Rs.3000 million have been invested in Hyderabad Facility as part of the company's expansion roadmap," HFCL said on Thursday.

Speaking on the development, Managing Director, Mahendra Nahata, HFCL said, "India is seeing buoyant FTTH activity driven by private telcos and the government's thrust on rural network deployment. Expanding FTTH rollouts will not only boost the country's 4G connectivity but it also enhance readiness for 5G."

"The momentum in penetration of high-speed internet, increasing investment in digital networks and growing demand for affordable access makes us excited to serve the next-generation communication needs of customers in India and across the globe," he said.

The FTTH cable plant has backward integration for supplies of major raw materials like optical fibre and ARP rods from the company's existing manufacturing facilities, further strengthening the supply chain.

Apart from supplying FTTH cables to telecom service providers in India, HFCL will also be exporting them to more than 30 countries.

Shares of the company gained Rs 0.9, or 3.77%, to trade at Rs 24.80. The total volume of shares traded was 1,851,415 at the BSE (12.55 p.m., Thursday).
