HFCL, Qualcomm partner for 5G fixed wireless product development

New Delhi, Aug 8 (PTI) Domestic telecom gear maker HFCL Limited on Monday said it has entered into an agreement with Qualcomm Technologies for design and development of 5G millimeter wave fixed wireless access products for broadband services.

In the recently concluded spectrum auction, all the four bidders -- Reliance Jio, Bharti Airtel, Vodafone Idea and Adani Data Networks -- have purchased spectrum in the millimeter wave band, which is the 26 gigahertz frequency range. The mmWave has power to transmit signals at high speed but covers very short distances.

"Qualcomm Technologies is a recognized world leader in 5G technology and we are very pleased with this collaboration with Qualcomm Technologies, which also aligns with our commitment to bridge the digital divide globally," HFCL Managing Director Mahendra Nahata said in a statement.

Fixed Wireless Access (FWA) is becoming popular in mmWave bands across the world and it can be used as an alternative to fiber in high density or congested urban areas.

In continuation with its 5G product strategy, HFCL is expanding its 5G product portfolio by launching product development of 5G mmWave FWA CPE (customer premise equipment) products for India and global markets.

"We are excited that HFCL selected the Qualcomm 5G Fixed Wireless Access Platform Gen 2 to incorporate in its 5G mmWave FWA CPE products, further supporting the digital transformation of India by developing a suite of 5G infrastructure products," Qualcomm India and SAARC President Rajen Vagadia said.

HFCL partners Qualcomm Technologies for development of its Wi-Fi 6 portfolio of products

February 2021 | Miscellaneous, News

HFCL has strengthened its IO product portfolio of Wireless Solutions with the roll-out of Wi-Fi 6 products in addition to their existing Wi-Fi 5 Access Points (APs). This new range of IO products by HFCL is targeted to serve global Carriers, Enterprises and Internet Service Providers to provide seamless data connectivity to their consumers.

The perpetually growing demand for higher speeds, increasing density of connected devices and diverse applications have strained the wireless access networks to their limits. This critical challenge gets addressed by Wi-Fi 6 which is based on the IEEE 802.11ax standards. Wi-Fi 6 is capable of delivering >2 times the capacity & at 75% lower latency as compared to Wi-Fi 5 products.

Furthermore, the Wi-Fi 6 products are compatible and complementary to the upcoming 5G technology, offering a seamless integration with 5G core, enabling a smooth mobile data offload implementation for operators thereby providing lower latency & increased capacity over their predecessors without any hassles of a complex Wi-Fi ~ 3GPP core integration. Together they bring next-level, seamless functionality to the wireless world.

HFCL IO networks new product range consists of Wi-Fi 6 (802.11ax) Dual Band Outdoor & Indoor Access Points, and Telco Grade Cloud NMS support for comprehensive security features like WPA3, IEEE 802.1X and IEEE 802.11i to ensure higher encryption & secure data transfer of numerous, simultaneously connected devices. This latest range offers an ultimate solution for outdoor hotspots where high speed connectivity and security of data are the most important need of users who want to remain connected.

The new dual band Wi-Fi 6 Access Points are ideal for dense deployment including large enterprises, office buildings, retail outlets, malls, schools, stadiums, hospitals and many other areas. These APs showcase Wi-Fi Alliance Certified EasyMesh* support that can automatically create self-organizing, self-healing network interoperating even with third party APs with zero touch provisioning, making it very simple and easy to install and configure. Based on the Wi-Fi 6 standard, these APs deliver higher capacity, enhanced power efficiency, and best in class performance even in densely populated or congested environments.

Reported By TANAY SINGH THAKUR | AUGUST 8TH, 2022 AT 04:54 PM

Indian telcos have already taken mmWave spectrum from the Department of Telecommunications (DoT) in the recently held 5G spectrum auctions. The mmWave frequencies can be disturbed quite easily. Thus, the requirement for small cells and micro-sites will be very high to deliver mmWave 5G network services to customers, including both enterprise and retail.

HIGHLIGHTS

- HFCL has partnered with Qualcomm to bring India and global markets new mmWave 5G FWA products.
- With mmWave 5G FWA products, consumers will be able to enjoy super high speeds sitting at their homes and won't require fibre broadband connections any more.
- Indian telcos have already taken mmWave spectrum from the Department of Telecommunications (DoT) in the recently held 5G spectrum auctions.

HFCL has partnered with Qualcomm to bring new mmWave 5G FWA products to India and global markets. With mmWave 5G FWA products, users can get true 5G speeds and new use cases can be brought to life. HFCL Limited will expand its 5G product portfolio with 5G mmWave products. One of the best use cases for 5G networks is FWA (Fixed-Wireless Access). With FWA, telcos can provide network generation connectivity to customers at lower costs. They are a good alternative to fixed cable broadband connections. With

HFCL Limited: HFCL collaborates with Qualcomm for 5G millimeter wave FWA (Fixed Wireless Access) product development

NEW DELHI, Aug. 8, 2022 /PRNewswire/ -- HFCL Limited announced today, that it has entered into an agreement with Qualcomm Technologies, Inc. for HFCL's design and development of 5G millimeter wave (mmWave) FWA (Fixed Wireless Access) CPE (Customer Premise Equipment) products. In continuation with its 5G product strategy, HFCL is expanding its 5G product portfolio by launching product development of 5G mmWave FWA CPE products for India and global markets.

FWA helps operators with a cost-effective way to deliver fiber-like internet speeds wirelessly over 5G networks. It will enable new business opportunities for mobile operators by allowing them to offer fixed internet broadband services to consumers and enterprises using their 5G network infrastructure. HFCL's 5G mmWave FWA product portfolio aims to bridge the digital divide and will also enable telcos to successfully deliver broadband internet services in rural, suburban and dense urban areas.

HFCL's 5G mmWave FWA CPE products will support multiple spectrum bands required for the global markets. HFCL's FWA CPE products will leverage some of the advanced features of the Qualcomm 5G Fixed Wireless Access Platform Gen 2 featuring Snapdragon X65 5G Modem-RF System like extended-range, carrier aggregation and Qualcomm Dynamic Antenna Steering to deliver a superior customer experience.

"Qualcomm Technologies is a recognized world leader in 5G technology and we are very pleased with this collaboration with Qualcomm Technologies, which also aligns with our commitment to bridge the digital divide globally. FWA CPE will help strengthen HFCL's evolving 5G product portfolio and help create new revenue streams for our customers. It also aligns with our strategy to bring new products, to new customers, and to newer geographies," said Mahendra Nahata, Managing Director, HFCL.

"We are excited that HFCL selected the Qualcomm 5G Fixed Wireless Access Platform Gen 2 to incorporate in its 5G mmWave FWA CPE products, further supporting the digital transformation of India by developing a suite of 5G infrastructure products. Qualcomm Technologies is committed to powering innovations and supporting India's participation as a supplier of advanced 5G infrastructure products both to India and globally. We strongly believe that 5G mmWave fixed wireless access technology will help connect the unconnected and also offer wireless fiber connectivity to Indian consumers," said Rajen Vagadia, Vice President, Qualcomm India Private Limited and President, Qualcomm India & SAARC.

Global technology intelligence firm ABI Research forecasts worldwide 5G FWA market will increase from 6 million CPE units per year in 2022 to more than 26 million per year in 2028.

HFCL Will Bring 5G mmWave FWA Products for India by Collaborating with Qualcomm

UNCATEGORIZED

August 8, 2022 | Updated: 15 hours ago

By NMK

HFCL has partnered with Qualcomm to bring India and global markets new mmWave 5G FWA products. With the mmWave 5G FWA products, users can get true 5G speeds, and new use cases can come to life. HFCL Limited will be expanding its 5G product portfolio with the 5G mmWave products. One of the best use cases of 5G networks is FWA (fixed-wireless access). With FWA, telcos can deliver the network generation connectivity to the customers at lower costs. They are a good alternative to fixed-wired broadband connections. With mmWave 5G FWA products, consumers will be able to enjoy super high speeds sitting at their homes and won't require fibre broadband connections any more.

Here is the list of top 10 stocks that will be in focus today

Bharti Airtel: Telecom operator Bharti Airtel on Monday posted over a five-fold jump in its consolidated profit to ₹1,607 crore for the quarter ended June 2022, mainly on account of hike in tariffs. The company had posted a profit of ₹283.5 crore in the same period a year ago. Consolidated revenue from operations of Bharti Airtel increased by about 22% to ₹32,805 crore during the reported quarter from ₹26,854 crore earlier.

HCL: IT company HCL Infosystems on Tuesday posted a consolidated loss of ₹9.97 crore for the quarter that ended on June 30, 2022. The company had recorded a profit of ₹40.79 crore in the same period a year ago. The consolidated revenue from operations of HCL Infosystems declined by 67% to ₹9.12 crore during the reported quarter from ₹27.61 crore in the year-ago quarter.

Delhivery: Delhivery Ltd's consolidated net loss widened to ₹399 crore during the first quarter ended June 2022 as compared to a loss of ₹129.6 crore in the same quarter last year. The company's revenue rose by over 32% to ₹1,745.7 crore from ₹1,317.7 crore year-on-year (YoY). The company incurred an Adjusted EBITDA loss of ₹217 crore in QIFY23 versus an adjusted EBITDA loss of ₹58 crore (proforma) in QIFY22.

IGL: Indraprastha Gas Ltd, the firm that retails CNG and piped cooking gas in the national capital, on Tuesday reported a 72% rise in the June quarter net profit on the back of a rise in sales volume. Net profit of ₹420.86 crore in April-June compared with ₹244.29 crore in the corresponding quarter of last fiscal, the company said in a statement.

Tata Chemicals: Tata Chemicals on Tuesday reported an 86.25% increase in consolidated net profit at ₹637 crore during the quarter ending June. The company's net profit stood at ₹342 crore in the corresponding quarter of the previous fiscal, Tata Chemicals said in a regulatory filing. Revenue from operations of the company rose by 74.15% during the

HFCL collaborates with Qualcomm for 5G millimeter wave FWA (Fixed Wireless Access) product development. HFCL Limited announced today that it has entered into an agreement with Qualcomm Technologies, Inc. for HFCL's design and development of 5G millimeter wave (mmWave) FWA (Fixed Wireless Access) CPE (Customer Premise Equipment) products. In continuation with its 5G product strategy, HFCL is expanding its 5G product portfolio by launching product development of 5G mmWave FWA CPE products for India and global markets.

FWA helps operators with a cost-effective way to deliver fiber-like internet speeds wirelessly over 5G networks. It will enable new business opportunities for mobile operators by allowing them to offer fixed internet broadband services to consumers and enterprises using their 5G network infrastructure. HFCL's 5G mmWave FWA product portfolio aims to bridge the digital divide and will also enable telcos to successfully
