17	Gold Forest Investments	GoldForest Investments @Goldforestinves HFCL announces the launch of 5G Lab-as-a-Service **Press Release** **For immediate release** **HFCL announces the launch of 5G Lab-as-a-Service** **New Delhi, October 02, 2022:** HFCL Limited (HFCL), a leading telecom equipment manufacturer and technology provider today announced the launch of 5G Lab-as-a-Service to accelerate rollout of 5G solutions and services. Telecom operators are adopting multi-vendor networks based on cloud native technologies for faster and cost-effective rollout of 5G services and for improved user experience. There is also a need to support multiple frequency bands (sub-6 GHz, millimeter wave) and various deployment scenarios to realize diverse 5G use cases for Consumer, Enterprise and Industry Verticals. HFCL's 5G Lab-as-a-Service provides an automated test environment for the private sector, academia and government to work together on product innovations from concept to reality. The 5G Lab provides a sandbox for rapid prototyping of 5G use cases addressing the needs of various industry segments that include manufacturing, transportation, healthcare and retail. The 5G Lab will help to create pre-integrated and pre-validated 5G solutions for Low Mobility Large Cell needed for efficient rollout of rural mobile broadband in the country. *"Integration of multi-vendor, multi-technology systems is complex and requires validation and optimization of disaggregated components such as hardware, software, cloud and network functions for seamless deployment of 5G networks,"* said **Mahendra Nahata, Managing Director at HFCL.** *"HFCL's state-of-art 5G Lab will enable technology providers such as telecom operators, network equipment providers, system integrators, IoT device manufacturers to analyze, integrate and validate performance and capabilities of their products and solutions in a real 5G network environment,"* **Mr. Nahata** added. With a proven track record of delivering fully integrated solutions for telecom networks, HFCL is bringing its system integration expertise to 5G networks. The lab is equipped with a multi-vendor 5G network and industry leading test tools that include signal analyzer and signal generator for RF conformance tests, O-RAN studio, PTP conformance test equipment and anechoic chamber. HFCL has built an agile DevOps-based test platform for automated lab validation, field deployment, and service automation. HFCL is offering this 5G Lab-as-a-service (LaaS) to technology providers for: • Standard compliance and interface testing (3GPP) • Feature testing including functional, stress and performance testing • Proof of concept, pre-deployment and field testing 11:35 PM · Oct 3, 2022 · Twitter Web App	https://twitter.com/Goldforestinves/status/1576996869435424768	NA

India's HFCL focuses on new products to boost revenues

News Analysis
GAGANDEEP KAUR, Contributing Editor

10/10/2022

COMMENT (0)

One of the few Indian vendors to successfully transition from the domestic to the international markets is Himachal Futuristic Communications Limited (HFCL). While the company started its journey as an optical fiber manufacturer, it has recently made waves because of its new product development for growing markets.

"A key driver of the transition was that we wanted to grow our revenue by going beyond the Indian market," said Mahendra Nahata, managing director of HFCL, speaking to Light Reading. "To do so we had to develop our own design capabilities and procure new machinery, as every market has its own specific requirement for optical cable."

New product growth

The market expansion has helped the company grow revenues to 43.3 billion rupees (US$527 million) in 2021-22 from INR30.9 billion ($376 million) in 2017-18. And HFCL is investing heavily in new product development, working with partners outside of India to complement its booming fiber business.

HFCL launches 5G Lab-as-a-Service

The 5G Lab was inaugurated by TRAI chairman PD Vaghela on Sunday during the India Mobile Congress 2022.

ETTelecom • October 02, 2022, 20:17 IST

At the India Mobile Congress, 2022 today, Dr. P. D. Vaghela, Chairman, TRAI launched HFCL's '5G Lab-as-a-Service, to accelerate rollout of 5G solutions and services.

NEW DELHI: Homegrown telecom gear maker HFCL on Sunday launched its 5G Lab-as-a-Service to offer an automated test environment to the private sector,

Synopsis
The minister also asked companies participating in the Indian Mobile Congress to provide their input for the new telecom bill through which the government aims to simplify licensing regime.

Ashwini Vaishnaw

The government plans to set up 100 labs for 5G technology across India and at least 12 of them will be used to train students and conduct experiments, Telecom Minister Ashwini Vaishnaw said on Sunday.

The minister also asked companies participating in the Indian Mobile Congress to provide their input for the new telecom bill through which the government aims to simplify licensing regime.

"We are going to set up 100 5G labs across the country. I request the telecom industry to come together and convert at least 12 of these 100 labs into telecom incubators to train students and do experiments.

"The government is working significantly towards simplifying the licensing regime for all telecom players. I am really happy to see the energy of startups and MSMEs, who are going to rural areas to benefit people," Vaishnaw said.

At the event, indigenous telecom gear maker HFCL announced the launch of 5G Lab-as-a-Service to accelerate the rollout of 5G solutions and services. It

HFCL announces the launch of 5G Lab-as-a-Service

October 4, 2022

To speed the introduction of 5G products and services, HFCL Limited (HFCL) developed 5G Lab-as-a-Service.

Telecom operators are deploying multi-vendor networks based on cloud-native technology to accelerate and reduce the cost of deploying 5G services while improving customer experience. To actualize distinct 5G use cases for Consumer, Enterprise, and Industry Verticals, multiple frequency bands (sub-6 GHz, millimetre wave) and deployment scenarios are required.

Shortly after 5G services were launched in India by Prime Minister Narendra Modi at the India Mobile Congress (IMC) held in New Delhi, which will conclude on October 4, the government now plans to set up 5G labs across the country. Union Minister for Communications, Electronics & Information Technology Ashwini Vaishnaw said that the Indian government plans to set up 100 5G labs across the country, without mentioning any specific timeframe.

"We are going to set up 100 5G labs across the country. I request the telecom industry to come together and convert at least 12 of these 100 labs into telecom incubators to train students and do experiments," Vaishnaw said at the 6th edition of the country's marquee telecom and technology event.

The 5G labs by IT and telecom operators aren't new. In July 2022, GE Healthcare, a global medical technology solutions provider inaugurated its 5G Innovation Lab in Bengaluru, the first for GE Healthcare across the globe. Prior to that France-headquartered IT services major Capgemini announced that it has set up a 5G lab in Mumbai to accelerate the deployment of 5G. US-based Verizon's 5G Lab works with

HFCL launches 5G Lab-as-a-Service to speed up 5G implementation in the country

about 8 hours ago

To ensure the penetration of the 5G infrastructure into rural India via mobile broadband service, the 5G Lab will help creating pre-integrated and pre-validated 5G solutions for Low Mobility Large Cell.

The 5G Lab provides a 'sandbox' for rapid prototyping of 5G use cases addressing the needs of various industry segments that include manufacturing, transportation, healthcare and retail.

HFCL opens 5G Lab Service

By **Nick Booth** - 4 October 2022

Dr. P. D Vaghela (second from right in picture) Chairman of The Telecoms Regulatory Authority of India (TRAI) launched HFCL's 5G Lab-as-a-Service.

Every problem instantly solved by on the spot experts

Telecom equipment maker HFCL has launched a 5G Lab Service so that middle eastern, african and european telcos can perform an express delivery of their desired network. They plan to expedite the process of network building with a lab that can simulate any scenario, engineers who have tackled these problems before and technicians who know every technicality. By assembling all this expertise in one place, they promise they can cope with any eventuality.

Telecom operators are struggling to blend multi-vendor networks with cloud native technology while supporting multiple frequency bands for uses that diversify across the Consumer, Enterprise and Industry sectors, according to HFCL MD Mahendra Nahata. These challenges can be simplified by a systems integrator that specialises in these jobs for a living. The HFCL 5G Lab-as-a-Service provides an automated test environment for

HFCL Launches 5G Lab-as-a-Service

Article By : HFCL Ltd

Category : 5G | 2022-10-04 | (0) Comments

The 5G Lab provides a sandbox for rapid prototyping of 5G use cases addressing the needs of industry segments such as manufacturing and transportation.

Telecom operators are adopting multi-vendor networks based on cloud native technologies for faster and cost-effective rollout of 5G services and for improved user experience. There is also a need to support multiple frequency bands (sub-6 GHz, millimeter wave) and various deployment scenarios to realize diverse 5G use cases for consumer, enterprise and industry verticals.

In line with this, telecom equipment manufacturer and technology provider HFCL Ltd has launched its 5G Lab-as-a-Service to accelerate rollout of 5G solutions and services. HFCL's 5G Lab-as-a-Service provides an automated test environment for the private sector, academia, and government to work together on product innovations from concept to reality. The 5G Lab provides a sandbox for rapid prototyping of 5G use cases addressing the needs of various industry segments that include manufacturing, transportation, healthcare and retail. The 5G Lab will help to create pre-integrated and pre-validated 5G solutions for Low Mobility Large Cell needed for efficient rollout of rural mobile broadband in the country.

"Integration of multi-vendor, multi-technology systems is complex, and requires validation and optimization of disaggregated components such as hardware, software, cloud and network functions for seamless deployment of 5G networks," said Mahendra Nahata, Managing Director of HFCL. "HFCL's state-of-art 5G Lab will enable technology providers such as telecom operators, network equipment providers, system integrators,

New Delhi, Oct 2 (PTI) The government plans to set up 100 labs for 5G technology across India and at least 12 of them will be used to train students and conduct experiments, Telecom Minister Ashwini Vaishnaw said on Sunday.

The minister also asked companies participating in the Indian Mobile Congress to provide their input for the new telecom bill through which the government aims to simplify licensing regime.

"We are going to set up 100 5G labs across the country. I request the telecom industry to come together and convert at least 12 of these 100 labs into telecom incubators to train students and do experiments.

"The government is working significantly towards simplifying the licensing regime for all telecom players. I am really happy to see the energy of startups and MSMEs, who are going to rural areas to benefit people," Vaishnaw said.

At the event, indigenous telecom gear maker HFCL announced the launch of 5G Lab-as-a-Service to accelerate the rollout of 5G solutions and services. It will provide an automated test environment for the private sector, academia and government to work together on product

HFCL announces the launch of 5G Lab-as-a-Service

October 2, 2022 technuter 0 Comments

HFCL announced the launch of 5G Lab-as-a-Service to accelerate rollout of 5G solutions and services. Telecom operators are adopting multi-vendor networks based on cloud native technologies for faster and cost-effective rollout of 5G services and for improved user experience. There is also a need to support multiple frequency bands (sub-6 GHz, millimeter wave) and various deployment scenarios to realize diverse 5G use cases for Consumer, Enterprise and Industry Verticals.

HFCL's 5G Lab-as-a-Service provides an automated test environment for the private sector, academia and government to work together on product innovations from concept to reality. The 5G Lab provides a sandbox for rapid prototyping of 5G use cases addressing the needs of various industry segments that include manufacturing, transportation, healthcare and retail. The 5G Lab will help to create pre-integrated and pre-validated 5G solutions for Low Mobility Large Cell needed for efficient rollout of rural mobile broadband in the country.

HFCL ANNOUNCES THE LAUNCH OF 5G LAB-AS-A-SERVICE

Posted by: Mahender October 3, 2022 in PR

New Delhi, October 02, 2022:- HFCL Limited (HFCL), a leading telecom equipment manufacturer and technology provider today, announced the launch of 5G Lab-as-a-Service to accelerate rollout of 5G solutions and services.

Telecom operators are adopting multi-vendor networks based on cloud native technologies for faster and cost-effective rollout of 5G services and for improved user experience. There is also a need to support multiple frequency bands (sub-6 GHz, millimeter wave) and various deployment scenarios to realize diverse 5G use cases for Consumer, Enterprise and Industry Verticals.

HFCL's 5G Lab-as-a-Service provides an automated test environment for the private sector, academia and government to work together on product innovations from concept to reality. The 5G Lab provides a sandbox for rapid prototyping of 5G use cases addressing the needs of various industry segments that include manufacturing, transportation, healthcare and retail. The 5G Lab will help to create pre-integrated and pre-validated 5G solutions for Low Mobility Large Cell needed for efficient rollout of rural mobile broadband in the country.

Commenting on this Mr. Mahendra Nahata, Managing Director at HFCL said "Integration of multi-vendor, multi-technology systems is complex, and requires validation and optimization of disaggregated components such as hardware, software, cloud and network functions for seamless deployment of 5G networks."

Mr. Nahata further added, "HFCL's state-of-art 5G Lab will enable technology providers such as telecom operators, network equipment providers, system integrators, IoT device manufacturers to analyze, integrate and validate performance and capabilities of their products and solutions in a real 5G network environment."

With a proven track record of delivering fully integrated solutions for telecom networks, HFCL is bringing its system integration expertise to 5G networks. The lab is equipped with a multi-vendor 5G network and industry leading test tools that include signal analyzer and signal generator for RF conformance tests, O-RAN studio, PTP conformance test equipment and anechoic chamber. HFCL has built an agile DevOps-based test platform for automated lab validation, field deployment, and service automation.

HFCL is offering this 5G Lab-as-a-service (LaaS) to technology providers for:

5G labs to be set up by Government

We are going to set up 100 5G labs across the country. I request the telecom industry to come together and convert at least 12 of these 100 labs into telecom incubators to train students and do experiments

Across India, the government plans to set up 100 5G labs for 5G technology and to train students and conduct experiments, at least 12 5G labs out of 100 will be used, Telecom Minister Ashwini Vaishnaw said on Sunday.

For the new telecom bill through which the government aims to simplify licensing regime, the minister also asked companies participating in the Indian Mobile Congress to provide their input.

"We are going to set up 100 5G labs across the country. I request the telecom industry to come together and convert at least 12 of these 100 labs into telecom incubators to train students and do experiments."

"The government is working significantly towards simplifying the licensing regime for all telecom players. I am really happy to see the energy of start-ups and MSMEs, who are going to rural areas to benefit people," Vaishnaw said.

To accelerate the rollout of 5G solutions and services, indigenous telecom gear maker HFCL announced the launch of 5G Lab-as-a-Service at the event. To work together on product innovations from concept to reality, it will provide an automated test environment for the private sector, academia and government.

The launch of 5G is going to be a defining moment for not only India, but for the world, said Commerce and Industry Minister Piyush Goyal at the India Mobile Congress.

"A large economy like India, which has talent, is emerging from the shadows to take a leadership role. We are now indigenously designing, developing and

Govt to set up 100 labs for 5G technology across India: Ashwini Vaishnaw

Telecom Minister Ashwini Vaishnaw has said that the government plans to set up 100 labs for 5G technology across India and at least 12 of them will be used to train students and conduct experiments.

The minister also asked companies participating in the Indian Mobile Congress to provide their input for the new telecom bill through which the government aims to simplify licensing regime.

Mr. Vaishnaw said the government is working significantly towards simplifying the licensing regime for all telecom players. Telecom Minister said he is really happy to see the energy of startups and MSMEs, who are going to rural areas to benefit people.

Indigenous telecom gear maker HFCL announced the launch of 5G Lab-as-a-Service to accelerate the rollout of 5G solutions and services. It will provide an automated test environment for the private sector, academia, and government to work together on product innovations from concept to reality.

Commerce and Industry Minister Piyush Goyal said that the launch of 5G is going to be a

5G Lab-as-a-Service is now available, according to HFCL.

HFCL Limited (HFCL), a leading telecom equipment manufacturer and technology provider today, announced the launch of 5G Lab-as-a-Service to accelerate rollout of 5G solutions and services.

Telecom operators are adopting multi-vendor networks based on cloud-native technologies for faster and cost-effective rollout of 5G services and for improved user experience. There is also a need to support multiple frequency bands (sub-6 GHz, millimeter wave) and various deployment scenarios to realize diverse 5G use cases for Consumer, Enterprise and Industry Verticals.

HFCL's 5G Lab-as-a-Service provides an automated test environment for the private sector, academia and government to work together on product innovations from concept to reality. The 5G Lab provides a sandbox for rapid prototyping of 5G use cases addressing the needs of various industry segments that include manufacturing, transportation, healthcare and retail. The 5G Lab will help to create pre-integrated and pre-validated 5G solutions for Low Mobility Large Cell needed for efficient rollout of rural mobile broadband in the country.

Commenting on this **Mr. Mahendra Nahata, Managing Director at HFCL** said, "Integration of multi-vendor, multi-technology systems is complex, and requires validation and optimization of disaggregated components such as hardware, software, cloud and network functions for seamless deployment of 5G networks."

Mr. Nahata further added, "HFCL's state-of-art 5G Lab will enable technology providers such as telecom operators, network equipment providers, system integrators, IoT device manufacturers to analyze, integrate and validate performance and capabilities of their products and solutions in a real 5G network environment."

With a proven track record of delivering fully integrated solutions for telecom networks, HFCL is bringing its system integration expertise to 5G networks. The lab is equipped with a multi-vendor 5G network and industry-leading test tools that include signal analyzer and signal generator for RF conformance tests, O-RAN studio, PTP conformance test equipment and anechoic chamber. HFCL has built an agile DevOps-based test platform for automated lab validation, field deployment, and service automation.

HFCL is offering this 5G Lab-as-a-Service (LaaS) to technology providers for:

- Standard compliance and interface testing (3GPP)
- Feature testing including functional, stress and performance testing
- Proof of concept, pre-deployment and field testing
- End user devices, network functions, infrastructure and applications testing

HFCL will provide access to highly skilled teams with expertise in 5G networks and devices including expertise in DevOps, CI/CD, Kubernetes, and cloud-native technologies that are needed for testing in 5G environments.

From rapid prototyping to end-to-end testing, HFCL's 5G Lab will enable telecom operators and ecosystem partners to innovate and co-create 5G solutions, services and business models to build new 5G use cases and

https://affairscloud.com/%E0%A4%9B%E0%A4%A0%E0%A5%80-%E0%A4%87%E0%A4%82%E0%A4%A1%E0%A4%BF%E0%A4%AF%E0%A4%BE-%E0%A4%AE%E0%A5%8B%E0%A4%AC%E0%A4%BE%E0%A4%87%E0%A4%B2-%E0%A4%95%E0%A4%BE%E0%A4%82%E0%A4%97%E0%A5%8D%E0%A4%B0/

प्रमुख बिंदु:

IMC 2022 के दौरान, भारतीय दूरसंचार नियामक प्राधिकरण (TRAI) के अध्यक्ष PD वाघेला ने स्वदेशी दूरसंचार गियर निर्माता **HFCL** की **'5G लैब-एज़-ए-सर्विस'** का अनावरण किया है।

5G लैब 5G समाधान और सेवाओं पर काम करने के लिए निजी क्षेत्र, सरकार और शिक्षाविदों को स्वचालित परीक्षण वातावरण प्रदान करेगी।

MoS प्रल्हाद जोशी ने खनन क्षेत्र के लिए सुरक्षा समाधान QoSec लॉन्च किया

संसदीय कार्य मंत्रालय के राज्य मंत्री (MoS) प्रल्हाद जोशी ने IMC 2022 में QoSec माइनिंग सॉल्यूशंस लॉन्च किए। इसे **सेंसरिस**, मशीन टू मशीन सर्विस प्रोवाइडर (M2MSP) द्वारा विकसित किया गया है।

- यह एक अनूठा समाधान है जो एक बुद्धिमान एप्लेट प्रोग्राम का उपयोग करके किसी भी ट्रैकिंग डिवाइस से डेटा को सुरक्षित रूप से एन्क्रिप्ट करेगा।
- **सेंसरिस के CEO** – मनीष खरे

लॉन्च के पीछे का कारण:

किसी भी खनिज परिवहन निगरानी समाधान में प्रभावी निगरानी के लिए ट्रांजिट चोरी को छिपाने के लिए एक नकली डिवाइस या एक दुष्ट सर्वर से नकली डेटा को धक्का देने का विवादास्पद प्रयास एक गंभीर खतरा रहा है। अब, इस समाधान का सुरक्षा डिज़ाइन डेटा को निजी और हैकिंग और साइबर हमलों से एंड-टू-एंड एन्क्रिप्शन और डेटा के डिक्रिप्शन द्वारा सुरक्षित रखेगा।

With HFCL as the Driver, 5G is Off and Running in India

October 10, 2022 5:54 am SHARE THIS ARTICLE

As 5G service commences in India, a flurry of announcements from HFCL Limited (HFCL), a telecom equipment manufacturer based in New Delhi, have begun concerning the equipment that will be used on those networks. The messaging provides new details on the country's "homegrown" 5G network, designed and built by Indian companies. Prime Minister Nerendra Modi has voiced great pride having kicked off the 5G services at a ceremony at the India Mobile World Congress 2022 in New Delhi.

Reliance Jio started providing 5G services in four cities — Delhi, Mumbai, Kolkata and Varanasi — and Bharti Airtel in parts of eight cities — Delhi, Mumbai, Varanasi, Bengaluru, Chennai, Hyderabad, Nagpur and Siliguri, according to the *Economic Times of India*.

Also at the India Mobile World Congress, HFCL, launched the first product from its 5G product family, a mid-band 5G 8T8R macro radio unit (RU). The macro RU combines the vRAN and O-RAN-based standards, is 3GPP Release 15 and 16 compliant, and supports n78 frequency
