HFCL teams up with Microsoft to roll out private 5G solutions for enterprises

New Delhi, Mar 9 (PTI) Domestic telecom gear maker HFCL on Thursday said it has collaborated with Microsoft to roll out private 5G solutions for enterprises, as businesses eye the next generation technology to spur digital transformation.

With the rapid rollout of 5G in India, enterprises are looking at the next generation technology to further their digital transformation, including the promise of Industry 4.0, HFCL said in a statement.

"HFCL has collaborated with Microsoft to create converged private 5G solutions that harness new-age technologies of IoT (Internet of Things), cloud, edge computing, AI (Artificial Intelligence) and analytics to transform industry verticals that include manufacturing, retail and warehouse, mining, education, defence, railways, smart city," it said.

HFCL is deploying one such private 5G-enabled Industry 4.0 solution as a pilot programme using Microsoft Azure public MEC (multi-access edge compute) and HFCL 5G Indoor Small Cell, at its optical fiber manufacturing plant in Hyderabad.

Along the fiber production line, HFCL's 5G small cells enable real-time fiber defect detection using video analytics and image processing.

Microsoft Azure public MEC, which integrates Azure compute and edge-optimised Azure services with the mobile operator's public 5G network connectivity, analyses this video data in real-time to identify any defects and generates insights for root cause analysis and preventive care.

Through this AI-enabled, cloud-connected, low-latency private 5G solution, HFCL is improving the operational efficiency and manufacturing agility of its fiber manufacturing plant.

Mahendra Nahata, Managing Director of HFCL, said, "We are very pleased with our collaboration with Microsoft in implementing Industry 4.0 solution in our own factory as a pilot programme, using Microsoft Azure public MEC."

The best practices and the lessons learnt will act as a playbook to deploy private 5G solutions for manufacturing and other industry verticals embarking on a similar digital transformation journey, Nahata said.

HFCL ties up with Microsoft to roll out pvt 5G solutions

New Delhi, Mar 9 (UNI) HFCL on Thursday said it has collaborated with Microsoft to create converged private 5G solutions.

HFCL is deploying a private 5G enabled industry 4.0 solution as a pilot program using Microsoft Azure public MEC and HFCL 5G Indoor Small Cell, at its Optical Fiber manufacturing plant in Hyderabad, a statement from the company said.

Along the fiber production line, HFCL's 5G small cells enable real-time fiber defect detection using video analytics and image processing.

Microsoft Azure public MEC which integrates Azure compute and edge-optimized Azure services with the mobile operator's public 5G network connectivity, analyses this video data in real-time to identify any defects and generates insights for root cause analysis and preventive care.

Through this AI-enabled, cloud-connected, low-latency private 5G solution, HFCL is improving the operational efficiency and manufacturing agility of its fiber manufacturing plant, the statement added.

"We are very pleased with our collaboration with Microsoft in implementing Industry 4.0 solution in our own factory as a pilot program, using Microsoft Azure public MEC. The best practices and the lessons learnt will act as a playbook to deploy Private 5G solutions for manufacturing and other industry verticals embarking on a similar digital transformation journey," said Mahendra Nahata, Managing Director at HFCL.

"Microsoft Azure provides seamless and rapid capabilities to roll out Industry 4.0 solutions at scale while solving critical business problems at the operator edge. HFCL can now leverage Azure compute, storage, networking, and AI capabilities for a comprehensive portfolio of private 5G use-cases across

HFCL partners Microsoft to offer pvt 5G solutions

FE BUREAU

New Delhi, March 9

TELECOM GEAR MAKER

HFCL on Thursday said it has partnered with Microsoft to offer private 5G solutions to enterprises. The company has started a pilot project for the same using its 5G indoor small cell and Microsoft Azure public architecture at its optical fiber manufacturing plant in Hyderabad. The deployment of the solutions will be primarily used to detect real-time fiber defect using video analytics and image processing.

HFCL will offer converged private 5G solutions that will leverage new-age technologies of IoT (internet of things), cloud, edge computing, artificial intelligence and analytics especially for sectors like manufacturing, retail, warehouse, mining, education, defence, railways, smart city, etc.

"We are very pleased with our collaboration with Microsoft in implementing the Industry 4.0 solution in our own factory as a pilot program, using Microsoft Azure public MEC (multi-access edge compute). The best practices and the lessons learnt will act as a playbook to deploy Private 5G solutions for manufacturing and other industry verticals embarking on a similar digital transformation journey," said Mahendra Nahata, managing director at HFCL.

TECH TALK

- Under the tie-up, HFCL to offer private 5G solutions to enterprises
- Deployment of the solutions to be used to detect real-time fibre defect
- HFCL will offer converged private 5G solutions that will leverage new-age tech

According to HFCL, Microsoft Azure public MEC provides easy integration with mobile operator's public 5G network connectivity, analyses video data in real-time to identify any defects and generates insights for root cause analysis and preventive care. Through this AI-enabled, cloud-connected, low-latency private 5G solution, HFCL is improving the operational efficiency and manufacturing agility of its fiber manufacturing plant, it said.

HFCL, Microsoft to roll out 5G solutions for entities

HFCL Ltd has joined hands with Microsoft Corp to roll out 5G solutions for entities, the company said in an exchange filing. The 5G solution, the filing said, will harness latest technologies to transform various industries including manufacturing, retail, education, and railways.

HFCL share price: The stock was last seen trading higher than the 5-day and 20-day moving averages but lower than the 50-day, 100- and 200-day moving averages.

Shares of **HFCL Ltd** gained nearly 4 per cent in Thursday's trade amid heavy volumes. The stock rose 3.63 per cent to hit a day high of Rs 70.20 over its previous close of Rs 67.74. Around 10.20 lakh shares changed hands today on BSE, which was twice the two-week average volume of 5.10 shares. Turnover on the counter stood at Rs 7.04 crore, commanding a market capitalisation (m-cap) of Rs 9,521.69 crore. Today's sharp movement in the share price came after the company entered into a collaboration with software giant Microsoft.

The company, in an exchange filing, said, "HFCL has collaborated with Microsoft to create converged private 5G solutions that harness new-age technologies of IoT, Cloud, Edge Computing, AI and Analytics to transform industry verticals that include manufacturing, retail & warehouse, mining, education, defence, railways, smart city, etc."

HFCL gains on collaborating with Microsoft for private 5G solutions for enterprises

Mar 09, 2023 01:40 PM | Source: capitalmarket.com

HFCL advanced 2.63% to Rs 69.52 after the company announced collaboration with Microsoft to roll out private 5G solutions for enterprises.

In an exchange filing made during market hours today, the company said that with the rapid rollout of 5G in India, enterprises are looking at 5G technology to further their digital transformation. GSA reports that 41% of private networks being deployed by enterprises are private 5G networks that enable deployment of high-performing infrastructure, which helps boost their connectivity,

productivity and operational flexibility.

HFCL has collaborated with Microsoft to create converged private 5G solutions that harness technologies of IoT, cloud, edge computing, AI and analytics to transform industry verticals that include manufacturing, retail & warehouse, mining, education, defence, railways, smart city, etc.

HFCL is deploying one such private 5G enabled industry 4.0 solution as a pilot program using Microsoft Azure public MEC and HFCL 5G indoor small cell, at its optical fiber manufacturing plant in Hyderabad.

Mahendra Nahata, managing director at HFCL, said: "We are very pleased with our collaboration with Microsoft in implementing Industry 4.0 solution in our own factory as a pilot program, using Microsoft Azure public MEC.

The best practices and the lessons learnt will act as a playbook to deploy Private 5G solutions for manufacturing and other industry verticals embarking on a similar digital transformation journey."

HFCL is engaged in a diverse telecom infrastructure enabler with active interest spanning telecom infrastructure development, system integration, and manufacture and supply of high-end telecom equipment, optic fibre and optic fibre cable (OFC).

The company's consolidated net profit rose 22.65% to Rs 96.13 crore despite a 10.65% fall in sales to Rs 1,085.84 crore in Q3 FY23 over Q3 FY22.

HFCL partners with Microsoft for 5G IoT solutions in India

HFCL, an Indian telecom infrastructure company, has teamed up with [Microsoft](#) to develop private 5G solutions that incorporate [IoT](#), Cloud, Edge computing, AI, and analytics technologies. These solutions aim to revolutionize a range of industry verticals including manufacturing, retail and warehouse, mining, education, defense, railways, and smart cities.

According to a report by [CNBCTV18](#), HFCL has already deployed an Industry 4.0 Private 5G solution at its optical fiber manufacturing plant in Hyderabad, India which uses Microsoft Azure public MEC and HFCL 5G Indoor Small Cell. This pilot program enables real-time fiber defect detection along the fiber production line using video analytics and image processing.

With the rollout of 5G in India, enterprises are increasingly turning to 5G technology to boost their digital transformation efforts. According to GSA, 41% of private networks being rolled out by enterprises are private 5G networks, which allow the deployment of high-performing infrastructure such as robotics, drones, and sensor-based and AI-based automation. HFCL's collaboration with Microsoft aims to leverage the potential of private 5G networks to transform various industry verticals by enabling the deployment of cutting-edge technologies.

HFCL to offer private 5G,in partnership with Microsoft

New Delhi, March 10, 2023: **HFCL has collaborated with Microsoft to create converged private 5G solutions that harness new-age technologies of IoT, Cloud, Edge Computing, AI and Analytics to transform Industry verticals that include manufacturing, retail & warehouse, mining, education, defence, railways, smart city, etc.**

HFCL is deploying one such Private 5G enabled Industry 4.0 solution as a pilot program using Microsoft Azure public MEC and HFCL 5G Indoor Small Cell, at its Optical Fiber manufacturing plant in Hyderabad. Along the fiber production line, HFCL's 5G small cells enable real-time fiber defect detection using video analytics and image processing.

The Global Mobile Suppliers Association reports that 41% of private networks being deployed by enterprises are private 5G networks that enable deployment of high-performing infrastructure like robotics, drones, sensor-based and AI-based automation, etc. to boost their connectivity, productivity and operational flexibility.

Microsoft Azure public MEC which integrates Azure compute and edge-optimized Azure services with the mobile operator's public 5G network connectivity, analyses this video data in real-time to identify any defects and generates insights for root cause analysis and preventive care. Through this AI-enabled, cloud-connected, low-latency private 5G solution, HFCL is improving the operational efficiency and manufacturing agility of its fiber manufacturing plant.

"We are very pleased with our collaboration with Microsoft in implementing Industry 4.0 solution in our own factory as a pilot programme, using Microsoft Azure public MEC. The best practices and the lessons learnt will act as a playbook to deploy Private 5G solutions for manufacturing and other industry verticals embarking on a similar digital transformation journey," said Mahendra Nahata, Managing Director at HFCL.

"Microsoft Azure provides seamless and rapid capabilities to roll out Industry 4.0 solutions at scale while solving critical business problems at the operator edge. HFCL can now leverage Azure compute, storage, networking, and AI capabilities for a comprehensive portfolio of private 5G use-cases across industry verticals," said Samik Roy, Executive Director, Corporate, Medium, Small Business, Microsoft India.

HFCL is a leading technology company specialising in creating digital networks for telcos, enterprises and governments.

HFCL partners Microsoft for private 5G

Homegrown telecom gear maker [HFCL](#) on Thursday collaborated with Microsoft to roll out private 5G solutions for enterprises.

The collaboration is to create converged private [5G solutions](#) that harness new-age technologies of IoT, cloud, edge computing, AI and much more.

The firm is deploying one such Private 5G-enabled Industry 4.0 solution as a pilot programme using Microsoft Azure public MEC and HFCL 5G Indoor Small Cell at its optical fiber manufacturing plant in Hyderabad.

Along the fiber production line, HFCL's 5G small cells enable real-time fiber defect detection using video analytics and image processing.

Through this AI-enabled, cloud-connected and low-latency private 5G solution, HFCL is improving the operational efficiency and manufacturing agility of its fiber plant.

HFCL is also using Azure for its Rise with SAP project. Furthermore, HFCL has deployed its Cloud Network Management System (CNMS) on Azure to provide centralised visibility and control of its IO portfolio of communication products.

HFCL is an India-based company that is primarily engaged in the manufacturing of telecommunication equipment, optical fiber cables and intelligent power systems.
