## HFCL plans to further expand Optic Fiber capacity on backdrop of witnessing strong market demand for Optic Fiber Cable

### Sunvilla News: Ahmedabad

HFCL Limited, India's leading technology enterprise offering communication network solutions for Telcos, Railways, and Defence sectors has announced the expansion of its current capacity of its high-quality optical fiber manufacturing from 10 million fiber km/per annum to 33.90 million fiber km/per annum instead of 24.94 million fiber km as planned earlier. This is in continuation to its earlier expansion plans announced for its existing state-of-the-art manufacturing facility at Hyderabad, India. HFCL is witnessing strong market demand for Optical Fiber Cable and this strategic initiative aims to achieve the dual objectives of margin accretion and insulation

from sourcing vagaries. The company has earmarked an estimated capex of ~ ₹470 Crores and will be using debt and internal accruals as the mode of financing. The capacity will be added in a phased manner, with the completion targeted by December 2024. The decision to further enhance capacity expansion will further lead to operational synergy and help capitalize on the growing market demand for optical fiber cables (OFC). As a technology-driven, HFCL has a strong focus on the development of innovative and futuristic technological products in order to meet customer needs effectively. The proposed expansion will not only strengthen supply chain capabilities but also improve overall margins of the Company.

## HFCL to further expand OFC manufacturing capacity on backdrop of strong market demand

June 2023 | Network and Equipment, News

HFCL Limited has announced the expansion of the current capacity of its high-quality optical fibre cable (OFC) manufacturing from 10 million fibre km/per annum to 33.9 million fibre km/per annum instead of 24.94 million fibre km as planned earlier. This is in continuation to its earlier expansion plans announced for its existing state-of-the-art manufacturing facility in Hyderabad, India.

HFCL is witnessing strong market demand for OFC and this strategic initiative aims to achieve the dual objectives of margin accretion and insulation from sourcing vagaries. The company has earmarked an estimated capex of nearly Rs 4.7 billion and will be using debt and internal accruals as the mode of financing. The capacity will be added in a phased manner, with the completion targeted by December 2024.

## HFCL To Increase Their Optical Manufacturing Capacity

Asia Manufacturing Review Team

---

The capacity of optical fibre manufacturing at HFCL will be increased from 10 million fibre km/year to 33.90 million fibre km/year by the end of December 2024.

HFCL said in a statement Thursday that the company has set aside nearly Rs 470 crores for capital expenditure and will finance it with debt and internal accruals.

HFCL had previously planned to increase its OFC production capacity to 24.94 million fibre kilometres. "This is in continuation to its earlier expansion plans announced for its existing state-of-the-art manufacturing facility in Hyderabad, India," the company said.

## HFCL plans to further expand Optic Fiber capacity on backdrop of witnessing strong market demand for Optic Fiber Cable

Press Release

*Plans to further expand its high-quality Optic Fiber capacity to 33.90 million fiber km by December 2024 from the earlier planned capacity expansion of 24.94 million fiber km*

**National, 01 June 2023:** HFCL Limited, India's leading technology enterprise offering communication network solutions for Telcos, Railways, and Defence sectors has announced the expansion of its current capacity of its high-quality optical fiber manufacturing from **10 million fiber km/per annum to 33.90 million fiber km/per annum instead of 24.94 million fiber km** as planned earlier. This is in continuation to its earlier expansion plans announced for its existing state-of-the-art manufacturing facility at Hyderabad, India.

HFCL is witnessing strong market demand for Optical Fiber Cable and this strategic initiative aims to achieve the dual objectives of margin accretion and insulation from sourcing vagaries. The company has earmarked an estimated capex of ~ ₹470 Crores and will be using debt and internal accruals as the mode of financing. The capacity will be added in a phased manner, with the completion targeted by December 2024.

The decision to further enhance capacity expansion will further lead to operational synergy and help capitalize on the growing market demand for optical fiber cables (OFC). As a technology-driven, HFCL has a strong focus on
