**HFCL launches 5G solution for broadband connectivity**

New Delhi, Oct 27 (UNI) Telecom network solution provider HFCL on Friday said it has launched India's first indigenous 5G FWA (Fixed Wireless Access) CPE (Customer Premise Equipment) solution.

"Pioneering innovative and indigenously developed technology products, HFCL's portfolio of Indoor and Outdoor 5G FWA CPE products will accelerate broadband penetration in urban, rural areas of India and help bridge the last-mile connectivity challenge in India and other key global markets," the company said in a media release.

The telecom firm said there has been a remarkable surge in demand for safe and high-speed internet access in India driving the need for fiberisation and increased broadband penetration.

"In addition, the rising data demand from micro, small and medium enterprises is further

## HFCL launches 1st India-made 5G solution for last-mile Internet connectivity

IAN S · October 27, 2023 1:11 PM

New Delhi, Oct 27 (IANS) Enterprise and integrated next-gen communications products provider HFCL on Friday launched India's first indigenous 5G FWA (fixed wireless access) customer premise equipment (CPE) solution.

The indoor and outdoor 5G FWA CPE products will accelerate broadband penetration in urban, rural areas and help bridge the last-mile connectivity, the company said in a statement.

Built to complement wired broadband connections in areas where fibre rollout is limited, HFCL's range of 5G FWA CPE supports both 5G SA and NSA technologies across multiple Sub-6 GHz and mmWave frequency bands to offer cost-effective and fibre-like speeds to customers using the 5G network.

"HFCL's 5G FWA CPE portfolio of plug-and-play devices are lightweight, compact in size, have minimum power consumption and provide customer friendly features like Wi-Fi 6 technology to connect a large number of devices at high speed," said the company.

## [I] HFCL launches two wireless networking pdts for domestic, intl mkts

Informist, Friday, Oct 27, 2023

MUMBAI - HFCL Ltd today launched two wireless network connectivity products for the national and international markets, the company told exchanges. Of the two, one is a two-gigabytes-per-second unlicensed band radio and the other one is a unified cloud network management system, the company said.

These products were launched at the India Mobile Congress 2023 event in New Delhi.

The unlicensed band radio has fibre-like speed and adaptive radio frequency technology, the digital network solutions provider said.

HFCL added that users will be able to save up to 75% on the total cost of ownership as compared to the traditional backhaul solutions.

The second product, the unified cloud network management system, will offer easy management and monitoring of the unlicensed band radio and other wireless and wireline products in the company's portfolio. This artificial intelligence-powered system is designed to control, monitor and manage access points, switches and ultra-broadband radio devices.

Today, shares of HFCL closed nearly 2% higher at 64.60 rupees on the National Stock Exchange. End

## 6G To Come In India By 2030 Says Mahendra Nahata

 **Chetan Bhutani**  
New Delhi , Oct 30, 2023, Updated Oct 30, 2023, 1:05 PM IST

HFCL sees a strong demand environment in India and key global markets like the UK, USA and Middle East. Following the expansion of the 5G network, the company sees immense demand for Fiber optic cables, Telecom and networking products across the world, especially in markets like Europe and US. HFCL exports

The image shows a group of men at a trade show booth. In the center, a man in a light-colored kurta is looking towards the right. To his right, a man in a dark suit is pointing his right index finger upwards. In the background, there are banners for HFCL with text including 'GLOBAL PARTNERS', '1.75 LAKHS OFC', and '4G+ CO'. A blue semi-transparent box with white text is overlaid on the image.

## HFCL launches India's first indigenous 2 Gbps UBR

Company News

HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider has showcased its commitment to offer innovative technology solutions with the launch of India's first 2 Gbps Unlicensed Band Radio (UBR) and Unified Cloud Network Management System (UcNMS) at the India Mobile Congress 2023, Pragati Maidan, New Delhi.

## HFCL unveils India's first domestically produced 2 Gbps Unlicensed Band Radio

By Kaleah Salmon  
Journalist

Today

# 5g

# ai

HFCL, in a bid to revolutionise last-mile wireless connectivity, unveiled India's first indigenously crafted 2 Gbps Unlicensed Band Radio (UBR) during the India Mobile Congress 2023.

This milestone underscores HFCL's unwavering commitment to pioneering innovative technology solutions, propelling them to a prominent position in India and globally within the UBR landscape.

The 2 Gbps UBR offers fibre-like speeds and efficient spectrum utilisation, addressing India's digital transformation challenges through dynamic radio frequency (RF) technology.

INTERNET BUSINESS NEWS-(C)1995-2023 M2 COMMUNICATIONS

India-based technology company HFCL Ltd. has launched a suite of 5G products and network solutions, including 5G FWA CPE IP MPLS routers, 2 Gbps UBR and 1729 high-fiber count IBR optical fiber cable to address demand from telcos, the company said.

HFCL unveiled its suite of 5G products and network solutions at the India Mobile Congress 2023, one of Asia's largest telecom and digital technology forums, held during October 27 to October 29, 2023.

HFCL has introduced its own designed and developed 5G FWA (Fixed Wireless Access) CPE (Customer Premise Equipment) solution in various variants.

Pioneering innovative technology products, HFCL's portfolio of Indoor and Outdoor 5G FWA CPE products will accelerate wireless broadband penetration in urban, rural areas and help bridge the last-mile connectivity challenge in key global markets.

**HFCL Unleashes Groundbreaking 5G Tech Suite**

Also • October 31, 2023 • 1 minute read

In a technology driven world, 5G is no longer the future, it's here. Announced at the India Mobile Congress, HFCL Limited, a leader in technology enterprise and integrated communications product solutions, launched a suite of pioneering 5G products and network solutions. The products are expected to revolutionize connectivity across the globe while addressing challenges of the digital landscape.

### HFCL Unveils Groundbreaking 5G Solutions

HFCL presented a comprehensive suite of next-generation connectivity products at the India Mobile Congress 2023. Their line-up ranges from 5G FWA (Fixed Wireless Access) CPE (Customer Premise Equipment), IP MPLS Routers, 2 Gbps UBR (Unlicensed Band Radio), to 1728-high-fiber count IBR (Intermittently Bonded Ribbon) Optical Fibre Cable. The products are anticipated to provide cost-effective solutions while addressing last-mile connectivity challenges.

### Addressing Connectivity Needs with HFCL's New Products

The company's unique 5G FWA CPE solution is designed to facilitate wireless broadband penetration across both urban and rural areas. Its 2 Gbps UBR enhances backhauling and wireless connectivity, positioning HFCL as a significant figure in the UBR industry. The new IP MPLS Routers, introduced by HFCL, are aimed to empower telcos to backhaul 5G networks, fibre broadband networks, and provide last-mile connectivity. For high-capacity data centres, HFCL's 1728-high-fiber count IBR Optical Fibre Cable serves as an effective solution.

### HFCL's Vision for a Robust Digital Infrastructure

HFCL's Managing Director, Mahendra Nahata spoke about the company's future vision. He highlighted how HFCL's newly launched ensemble of next-gen technologies aims to

## **HFCL TO INVEST ₹200 CR TO MAKE 5G FWA DEVICE**

HOMEGROWN TELECOM equipment maker HFCL will invest about ₹200 crore for manufacturing 5G fixed wireless access (FWA) consumer premise devices and on research and development related to the technology, MD Mahendra Nahata told FE in an interaction.

## HFCL unveils 5G fixed wireless solution

**Mumbai:** HFCL Ltd's shares were up nearly 2 per cent after the company unveiled 5G Fixed Wireless Access Customer Premise Equipment solution. This development aims to meet the escalating demand for high-speed internet connectivity, particularly in India. The line-up of Indoor and Outdoor 5G FWA CPE products is designed to address the last-mile connectivity challenge. OUR BUREAU

## HFCL introduces indigenous 5G FWA CPE solution at IMC 2023

HFCL Limited has launched its indigenous 5G FWA (Fixed Wireless Access) CPE (Customer Premises Equipment) solution, pioneering innovative and indigenously developed technology products.

HFCL's 5G FWA CPE portfolio of fixed and play devices are lightweight, compact in size, low minimum power consumption and provide customer friendly features like 4G/LTE technology to connect a large number of devices at high speed and come with an AI-integrated mobile app for self-installation and assist in identifying the best location with strong signal reception.

HFCL's portfolio of indoor and outdoor 5G FWA CPE products will accelerate broadband penetration in urban, rural areas of India and help bridge the last-mile connectivity challenge in India and other key global markets.

There has been a remarkable surge in demand for urban and high-speed internet services in India driving the need for fibreisation and increased broadband penetration. In addition, the rising data demand from micro, small and medium enterprises is further pushing the need

for an innovative connectivity solution. A report from Bank of America estimates that 5G-based FWA services could be worth up to \$2bn a year and may be a valuable substitute for fibre broadband.

With its compact and fixed broadband connections in areas where fibre rollout is limited, HFCL's range of 5G FWA CPE supports both 4G/LTE and 5G technologies across multiple bands and innovative frequency bands to offer cost-effective and flexible speeds to customers using the 5G network.

HFCL's 5G FWA CPE portfolio of fixed and play devices are lightweight, compact in size, low minimum power consumption and provide customer friendly features like 4G/LTE technology to connect a large number of devices at high speed and come with an AI-integrated mobile app for self-installation and assist in identifying the best location with strong signal reception.

HFCL's 5G FWA CPE portfolio offers new business opportunities for telecom service providers (TSPs) by allowing them to offer fixed internet broadband services to consumers and enterprises using their 5G network infrastructure.

"We take immense pride in being the first homegrown company to design and introduce 5G FWA CPE solution that is set to revolutionize fibre-like 5G connectivity and take it to the next level across Indian and global markets. HFCL's Indoor and Outdoor 5G FWA CPEs will help telecom service providers tap into the growing demand of fixed wireless access, monetize their 5G investments and create new revenue streams from home and business broadband markets. As 5G networks expand, HFCL 5G FWA CPE portfolio becomes a key enabler for bridging the digital divide and ensuring internet access becomes more inclusive for all."

- Mahesh Kumar, Managing Director, HFCL Limited

## HFCL's indigenously built IP/MPLS Routers expected to drive 5G backhaul and transport networks

New Delhi : HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider, today announced the launch of its innovative IP/MPLS (Internet Protocol/Multi-Protocol Label Switching) Routers at India Mobile Congress 2023. Indigenously designed and developed, HFCL's IP/MPLS Router portfolio addresses the network connectivity needs and bandwidth challenges faced by telcos and enterprises in the fast-evolving digital landscape. This strategic launch underscores HFCL's commitment to driving technological advancements and meeting the evolving needs of the telecommunications industry. The comprehensive IP/MPLS Router product line introduced by HFCL aims to empower telcos to backhaul 5G networks, fiber broadband networks and provide last mile connectivity to enterprises in urban metros and tier 2 cities. As a front-runner in next-gen technology solutions, HFCL's router product line also stands ready to support Industry 4.0 by catering to enterprise-specific demands related to private 5G deployment. This IP/MPLS Router portfolio will help HFCL's customers build scalable and efficient networks that are capable of handling different types of data traffic, support Quality of Service (QoS) for bandwidth prioritization and avoid network congestion. These routers seamlessly integrate and inter-operate with telco's existing network infrastructure. HFCL's IP/MPLS routers have been designed to be compact and use industrial-grade components, making them ideal for deployment even in the most challenging environment and space-constrained locations. They offer robust security to protect sensitive customer information against potential threats.

## HFCL introduces indigenous 5G FWA CPE solution to revolutionize last-mile broadband connectivity

Sunvilla News : **Ahmedabad**

HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider has launched India's first indigenous 5G FWA (Fixed Wireless Access) CPE (Customer Premise Equipment) solution. Pioneering innovative and indigenously developed technology products, HFCL's portfolio of Indoor and Outdoor 5G FWA CPE products will accelerate broadband penetration in urban, rural areas of India and help bridge the last-mile connectivity challenge in India and other key global markets. There has been a remarkable

surge in demand for safe and high-speed internet access in India driving the need for fiberisation and increased broadband penetration. In addition, the rising data demand from micro, small and medium enterprises is further pushing the need for an innovative connectivity solution. A report from Bank of America estimates that 5G-based FWA services could be worth up to \$9bn a year and may be a valuable substitute for fibre broadband.

## Share Market Highlights 27 October 2023: Nifty above 19000, Sensex gains 635 pts, HCL Tech, Coal India, SBI gain, ITC, UPL drag

Updated - October 27, 2023 at 03:09 PM

**Sensex, Nifty Updates on 27 October 2023:** After a bearish run for 6 days, the NSE Nifty and Sensex, on Friday, rebounded and closed 1% higher. BSE Sensex gained 1.01% (634.65 pts) to close at 63,782.80 pts. Nifty surged 1.07% (202.45 pts) to close above the benchmark 19,000 pts level at 19,059.70 pts. Auto, IT, financial, and energy stocks led the rebound. Better-than-expected Q2 financial results boosted investor sentiments amid uncertain geopolitical situations in the Middle East, according to analysts. Asian Paints, Ultratech Cement and ITC were the laggards. MCL Tech, Coal India, and SBI emerged as the top gainers.

## IMC 2023: HFCL launches 1728-fiber IBR cable for data centers and 5G

October 28, 2023

HFCL Limited (HFCL) launched its innovative, high-fibre count Intermittently Bonded Ribbon (IBR) Cable at the ongoing India Mobile Congress, Pragati Maidan, New Delhi, India. HFCL's new 1728-high fibre count IBR cable offering will allow telcos and enterprises to accelerate installation of 5G network infrastructure, expand FTTH capabilities and address the rising demand for high[1]capacity networks particularly from data centres. HFCL is amongst the few companies in India and worldwide that has successfully developed this industry leading product.

HFCL launches India's first indigenous designed and developed 2 Gbps UBR

October 2023 | Products Release

HFCL Limited, has launched India's first 2 Gbps unlicensed band radio (UBR) and unified cloud network management system (UcNMS) at the India Mobile Congress 2023.

HFCL's 2 Gbps UBR is indigenously designed and developed to revolutionise last-mile wireless connectivity and bridge the digital divide challenge in the country with fibre-like speeds and efficient spectrum utilisation, with its adaptive radio frequency (RF) technology. Marking a significant leap in offering 5G backhauling and carrier grade enterprise wireless connectivity, the launch of Make-in-India 2 Gbps UBR positions HFCL as a dominant player in the growing Indian and global UBR market. This innovative product offers a low-latency, 2 Gbps connectivity solution which can operate across an extended 5GHz frequency range. It is designed for easy installation, effortless management, high reliability and has advanced security features to protect from external threat vectors. Further, in comparison to traditional backhaul solutions, 5G wireless backhauling with 2 Gbps UBR will enable HFCL's customers to save up to 75 per cent on the total cost of ownership (TCO).

## HFCL TO INVEST RS 200 CR FOR MANUFACTURE OF 5G FWA DEVICE, R&D

 By Binu Mathew 4 hours ago

Homegrown telecom equipment maker HFCL will invest about Rs 200 crore for manufacturing 5G fixed wireless access (FWA) consumer premise devices and on research and development (R&D) related to the technology, the company's managing director Mahendra Nahata told FE in an interaction.

For manufacturing the consumer premise equipment (CPE) for FWA, the company will set up a manufacturing facility in Delhi-NCR with an initial capex of Rs 100 crore out of the Rs 200 crore planned investment, over the next one year. The remaining Rs 100 crore has been earmarked for R&D.

## HFCL LAUNCHES 2GBPS UNLICENSED BAND RADIO FOR 5G BACKHAUL, ENTERPRISE CONNECTIVITY

By Biju Kumar 1 day ago

NEW DELHI: Homegrown telecom gear maker HFCL has launched its 2Gbps unlicensed band radio (UBR) and a Unified Cloud Network Management System (UcNMS) for last-mile connectivity.

"HFCL's 2 Gbps UBR is indigenously designed and developed to revolutionize last-mile wireless connectivity and bridge the digital divide challenge in the country with fiber-like speeds and efficient spectrum utilization, with its adaptive radio frequency (RF) technology," the vendor said in a statement Monday.

## HFCL launches 1728 fibre IBR cable to meet the growing demand of high fibre count cables from data centres and boost 5G network infrastructure

Published on October 30, 2023

Bangalore: HFCL Limited, a leading technology enterprise and integrated next-gen communications product and solution provider, yesterday launched its innovative, high-fibre count Intermittently Bonded Ribbon Cable at the ongoing India Mobile Congress, Pragati Maidan, New Delhi, India. HFCL's new 1728-high fibre count IBR cable offering will allow telcos and enterprises to accelerate installation of 5G network infrastructure, expand FTTH capabilities and address the rising demand for high[1]capacity networks particularly from data centres. HFCL is amongst the few companies in India and worldwide that has successfully developed this industry leading product.

As a leading manufacturer of optical fibre cables in India, HFCL is at the forefront of innovation, developing sustainable smaller duct size cables at its Hyderabad plant. Compared to traditional 864-fibre flat ribbon cables, the next-gen 1728-fiber IBR Cable offers twice the fibre packing density in the same diameter. HFCL's gel-free IBR cable is also optimised with high productivity mass fusion splicing for cost efficient deployment, easy installation in congested areas and quick restoration in case of any accidental outage. The manufacturing of these environmentally-friendly IBR cables is further poised to result in reducing plastic consumption per unit of fibre, lowering carbon footprint and expenses associated with network maintenance and upgrades.

## HFCL launches innovative IP/MPLS Routers at India Mobile Congress 2023

Oct-27-2023

HFCL has launched its innovative IP/MPLS (Internet Protocol/Multi-Protocol Label Switching) Routers at India Mobile Congress 2023. Indigenously designed and developed, HFCL's IP/MPLS Router portfolio addresses the network connectivity needs and bandwidth challenges faced by telcos and enterprises in the fast-evolving digital landscape. This strategic launch underscores HFCL's commitment to driving technological advancements and meeting the evolving needs of the telecommunications industry.

The comprehensive IP/MPLS Router product line introduced by HFCL aims to empower telcos to backhaul 5G networks, fiber broadband networks and provide last mile connectivity to enterprises in urban metros and tier 2 cities. As a front-runner in next-gen technology solutions, HFCL's router product line also stands ready to support Industry 4.0 by catering to enterprise-specific demands related to private 5G deployment. This IP/MPLS Router portfolio will help HFCL's customers build scalable and efficient networks that are capable of handling different types of data traffic, support Quality of Service (QoS) for bandwidth prioritization and avoid network congestion. These routers seamlessly integrate and inter-operate with telco's existing network infrastructure.

## HFCL launches pioneering suite of 5G products, network solutions

Oct-30-2023

HFCL has unveiled a pioneering suite of 5G products and network solutions at the India Mobile Congress 2023, Asia's one of the largest telecom and digital technology forum, held during October 27, 2023 to October 29, 2023. It has launched a comprehensive suite of next-gen connectivity products and solutions for the international markets, including 5G FWA (Fixed Wireless Access) CPE (Customer Premise Equipment), IP MPLS Routers, 2 Gbps UBR (Unlicensed Band Radio) and 1728-high fibre count IBR (Intermittently Bonded Ribbon) Optical Fibre Cable.

The company has unveiled its own designed and developed 5G FWA (Fixed Wireless Access) CPE (Customer Premise Equipment) solution in various variants. Pioneering innovative technology products, HFCL's portfolio of Indoor and Outdoor 5G FWA CPE products will accelerate wireless broadband penetration in urban, rural areas and help bridge the last-mile connectivity challenge in key global markets. Built to complement wired broadband connections in areas where fibre rollout is limited, HFCL's range of 5G FWA CPE support both 5G SA and NSA technologies across multiple Sub-6 GHz and mmWave frequency bands to offer cost-effective and fibre-like speeds to customers using the 5G network.

Marking a significant leap in offering 5G backhauling and carrier-grade enterprise wireless connectivity, the launch of 2 Gbps UBR positions HFCL as a dominant player in the growing Indian and global UBR market. This innovative product offers a low-latency, 2 Gbps connectivity solution which can operate across an extended 5GHz frequency range. It is designed for easy installation, effortless management, high reliability and has advanced security features to protect from external threat vectors. Further, in comparison to traditional backhaul solutions, 5G wireless backhauling with 2 Gbps UBR will enable HFCL's customers to save up to 75% on

## HFCL's indigenously built IP/MPLS Routers expected to drive 5G backhaul and transport networks

🕒 October 28, 2023

New Delhi, October 28, 2023: HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider, today announced the launch of its innovative IP/MPLS (Internet Protocol/Multi-Protocol Label Switching) Routers at India Mobile Congress 2023. Indigenously designed and developed, HFCL's IP/MPLS Router portfolio addresses the network connectivity needs and bandwidth challenges faced by telcos and enterprises in the fast-evolving digital landscape.

## HFCL launches 2 Gbps Unlicensed Band Radio (UBR) for enterprises and telcos

📅 October 30, 2023 👤 technuter 💬 0 Comments

HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider has showcased its commitment to offer innovative technology solutions with the launch of India's first 2 Gbps Unlicensed Band Radio (UBR) and Unified Cloud Network Management System (UcNMS) at the India Mobile Congress 2023, Pragati Maidan, New Delhi.

HFCL's 2 Gbps UBR is indigenously designed and developed to revolutionize last-mile wireless connectivity and bridge the digital divide challenge in the country with fiber-like speeds and efficient spectrum utilization, with its adaptive radio frequency (RF) technology. Marking a significant leap in offering 5G backhauling and carrier grade enterprise wireless connectivity, the launch of Make-in-India 2 Gbps UBR positions HFCL as a dominant player in the growing Indian and global UBR market. This innovative product offers a low-latency, 2 Gbps connectivity solution which can operate across an extended 5GHz frequency range. It is designed for easy installation, effortless management, high

## HFCL launches 1st India-made 5G solution for last-mile Internet connectivity

IANS | 27 Oct, 2023

Enterprise and integrated next-gen communications products provider HFCL on Friday launched India's first indigenous 5G FWA (fixed wireless access) customer premise equipment (CPE) solution.

The indoor and outdoor 5G FWA CPE products will accelerate broadband penetration in urban, rural areas and help bridge the last-mile connectivity, the company said in a statement.

Built to complement wired broadband connections in areas where fibre rollout is limited, HFCL's range of 5G FWA CPE supports both 5G SA and NSA technologies across multiple Sub-6 GHz and mmWave frequency bands to offer cost-effective and fibre-like speeds to customers using the 5G network.

India, Oct. 27 -- HFCL has launched India's first 2 Gbps Unlicensed Band Radio (UBR) and Unified Cloud Network Management System (UcnMS) at the India Mobile Congress 2023, Pragati Maidan, New Delhi.

HFCL's 2 Gbps UBR is indigenously designed and developed to revolutionize last-mile wireless connectivity and bridge the digital divide challenge in the country with fiber-like speeds and efficient spectrum utilization, with its adaptive radio frequency (RF) technology. Marking a significant leap in offering 5G backhauling and carriergrade enterprise wireless connectivity, the launch of Make-in-India 2 Gbps UBR positions HFCL as a dominant player in the growing Indian and global UBR market. This innovative product offers a low-latency, 2 Gbps c...

### HFCL launches 1728 fibre IBR cable to meet the growing demand of high fibre count cables from data centres and boost 5G network infrastructure

By Proven October 28, 2023 2 min read

New Delhi, October 28, 2023: HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider, yesterday launched its innovative, high-fibre count Intermittently Bonded Ribbon (IBR) Cable at the ongoing India Mobile Congress, Pragati Maidan, New Delhi, India. HFCL's new 1728-high fibre count IBR cable offering will allow telcos and enterprises to accelerate installation of 5G network infrastructure, expand FTTH capabilities and address the rising demand for high[1]capacity networks particularly from data centres. HFCL is amongst the few companies in India and worldwide that has successfully developed this industry leading product.

HFCL, in a bid to revolutionise last-mile wireless connectivity, unveiled India's first indigenously crafted 2 Gbps Unlicensed Band Radio (UBR) during the India Mobile Congress 2023.

This milestone underscores HFCL's unwavering commitment to pioneering innovative technology solutions, propelling them to a prominent position in India and globally within the UBR landscape.

The 2 Gbps UBR offers fibre-like speeds and efficient spectrum utilisation, addressing India's digital transformation challenges through dynamic radio frequency (RF) technology.
