# HFCL LAUNCHES 5G FIXED WIRELESS ACCESS PRODUCTS

HFCL ON FRIDAY launched indigenously developed 5G fixed wireless access products for telcos. Telcos will be able to give optical-fiber-like connectivity on 5G wireless networks to customers

# HFCL introduces indigenous 5G Fixed Wireless Access (FWA) Products

New Delhi, : HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider becomes the first Indian company to introduce its indigenously designed and developed 5G Fixed Wireless Access (FWA) Customer Premise Equipment (CPE) solution. As India emerges as one of the fastest nations to roll out 5G network, the 5G technology has already become a global phenomenon. As 5G continues its global proliferation, ensuring foolproof and efficient last-mile connectivity becomes paramount for network's overall performance and efficiency. To fully unleash 5G's potential, it is crucial to provide robust last-mile solution that cater to the diverse need of telecom service providers and end-users. Recognizing this imperative need, HFCL, a leading company in India in Telecom field, has introduced indigenously developed 5G Fixed Wireless Access (FWA) Products. Breaking new ground as the first company in India to achieve this milestone, HFCL's 5G FWA Products will be able to give optical-fiber-like connectivity on 5G wireless networks to the customers

bridging the gap between broadband served and unserved areas by ensuring flawless wireless broadband connectivity. This indigenous development underscores HFCL's unwavering commitment to shaping the future of communication and connectivity in the dynamic landscapes of India and beyond. HFCL's 5G FWA Products deliver not only high-speed and reliable broadband access but will also elevate device experiences, expanding accessibility, and providing faster speeds. This innovative FWA solution, catering to multi-bands (Sub 6 GHz, mmWave), multi-technology (5G Standalone and 5G non-standalone with LTE), Indoor as well as Outdoor eliminates the constraints of physical cable connection simultaneously serving as crucial bridge between the 5G network and end-user devices offering enhanced connectivity. The products are already under trial with domestic and international customers. Mr. Mahendra Nahata, Managing Director at HFCL, affirmed the Company's commitment, stating, "Bridging the digital divide is not just a mission but a commitment to empower every citizen. Our 5G FWA Prod-

ucts stand as technological vanguards in achieving this transformative goal. In urban sprawls and remote villages alike, these equipment ensure seamless wireless broadband connectivity, revolutionizing communication, and information access. At HFCL, our dedication to proliferating 5G across every corner of India is unwavering. We take pride in our Make in India contributions, relentlessly pushing the boundaries of innovation to bring contemporary technology to the heart of nation-building."

## Share Market Highlights 22 December 2023: Sensex climbs 241 pts to settle at 71,106; Nifty closes at 21,349

Updated - December 22, 2023 at 04:14 PM.

Sensex, Nifty updates 22 December 2023 : Positive global trends propel Sensex and Nifty upward on Friday. The benchmark BSE Sensex rose 241.86 points, or 0.34%, to 71,106.96, while the broader NSE index gained 98.25 points, or 0.46%, to 21,353.3, led by metals on a subdued U.S. dollar. Among the Sensex firms, Wipro jumped over 6 per cent, the most among the frontline companies. HCL Technologies, Tata Motors, Maruti, Tata Steel, Infosys, Tech Mahindra, Larsen & Toubro and JSW Steel were the other major winners. State Bank of India, Bajaj Finance, ICICI Bank, HDFC Bank, Axis Bank and IndusInd Bank were among the laggards.

## HFCL LAUNCHES 5G FWA SOLUTION FOR TELCOS, SAYS TRIALS UNDERWAY WITH CUSTOMERS

By Admin 4 days ago

Homegrown telecom gear maker HFCL on Friday launched its indigenously designed and developed 5G fixed wireless access (FWA) consumer premises equipment (CPE) for telecom operators, which it said will solve last-mile connectivity challenges and provide optical fiber-like connectivity to users via wireless fifth-generation networks.

HFCL said its 5G FWA products are already under trial with domestic and international customers. While citing industry estimates, it said the global 5G FWA market is expected to reach \$68 billion by 2030.

"This indigenous development underscores HFCL's unwavering commitment to shaping the future of communication and connectivity in the dynamic landscapes of India and beyond," the company said.

## HFCL introduces indigenous 5G Fixed Wireless Access (FWA) Products

December 22, 2023 technuter 0 Comments

**HFCL Limited (HFCL) launched its indigenously designed and developed 5G Fixed Wireless Access (FWA) Customer Premise Equipment (CPE) solution.**

As India emerges as one of the fastest nations to roll out 5G network, the 5G technology has already become a global phenomenon. As 5G continues its global proliferation, ensuring foolproof and efficient last-mile connectivity becomes paramount for network's overall performance and efficiency. To fully unleash 5G's potential, it is crucial to provide robust last-mile solution that cater to the diverse need of telecom service providers and end-users.

Recognizing this imperative need, HFCL, a leading company in India in Telecom field, has introduced indigenously developed 5G Fixed Wireless Access (FWA) Products. Breaking new ground as the first company in India to achieve this milestone, HFCL's 5G FWA Products will be able to give optical-fiber-like connectivity on 5G wireless networks to the customers bridging the gap between broadband served and unserved areas by ensuring flawless wireless broadband connectivity. This indigenous development underscores HFCL's unwavering commitment to shaping the future of communication and connectivity in the dynamic landscapes of India and beyond.

HFCL's 5G FWA Products deliver not only high-speed and reliable broadband access but will also elevate device experiences, expanding accessibility, and providing faster speeds. This innovative FWA solution, catering to multi-bands (Sub 6 GHz, mmWave), multi-technology (5G Standalone and 5G non-standalone with LTE), Indoor as well as Outdoor eliminates the constraints of physical cable connection simultaneously serving as crucial bridge between the 5G network and end-user devices offering enhanced connectivity. The products are already under trial with

### In 2024, We Can Expect Public WiFi Hotspots To Become Safer, Easier To Us

By Anand Parthasarathy

December 25, 2023: In the connected world of today, we feel the need to access the Internet wherever we are, at home, at work or in public places. The last has always been a dicey option.

While so many make use of public – and mostly free – WiFi networks, in malls, bus and railway stations, airport departure areas and lounges, it is usually a case of living dangerously. Because such public hotspots have been known to be the target of innumerable Net baddies, waiting to hack into the devices of WiFi users hoping to skim off some sensitive information: passwords, money transaction credentials, credit card CVVs.....

There has never been a perfect, uncrackable public network, where cyber criminals don't manage to neutralize every safety feature – in time.

But finally we could see change in 2024 and public WiFi might just be both secure and private – like a home or office network.

The technology to make this happen is called WBA OpenRoaming and it has been developed by the Wireless Broadband Alliance (WBA) of the world's leading telecom providers and solution developers. First showcased almost a year ago at the 2023 Mobile World Congress in Barcelona, it allowed delegates to seamlessly connect to Wi-Fi networks at the event venue, with a smooth and secure connectivity. Since then, dozens of carrier providers have come on board with the solution.

## HFCL introduces indigenous 5G Fixed Wireless Access (FWA) Products

December 26, 2023 Business, Markets

**New Delhi, December 26, 2023:** HFCL Limited (HFCL), a leading technology enterprise and integrated next-gen communications product and solution provider becomes the first Indian company to introduce its indigenously designed and developed 5G Fixed Wireless Access (FWA) Customer Premise Equipment (CPE) solution.

As India emerges as one of the fastest nations to roll out 5G network, the 5G technology has already become a global phenomenon. As 5G continues its global proliferation, ensuring foolproof and efficient last-mile connectivity becomes paramount for network's overall performance and efficiency. To fully unleash 5G's potential, it is crucial to provide robust last-mile solution that cater to the diverse need of telecom service providers and end-users.
